

Assignment 7: Deloitte Auditor Enterprise Chat UI - Web Services

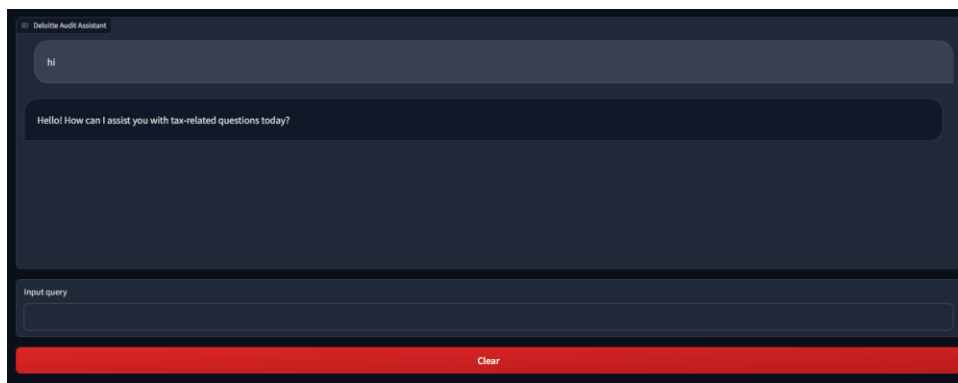

The app intends to work as chat bot specifically for Tax related queries for Deloitte.

For Deloitte Enterprise Integration team, to develop a Web Services interface and connect to the Open AI Models to consume Web Services, the app uses OpenAI API for ChatGPT. The prompts are limited to tax related queries only.

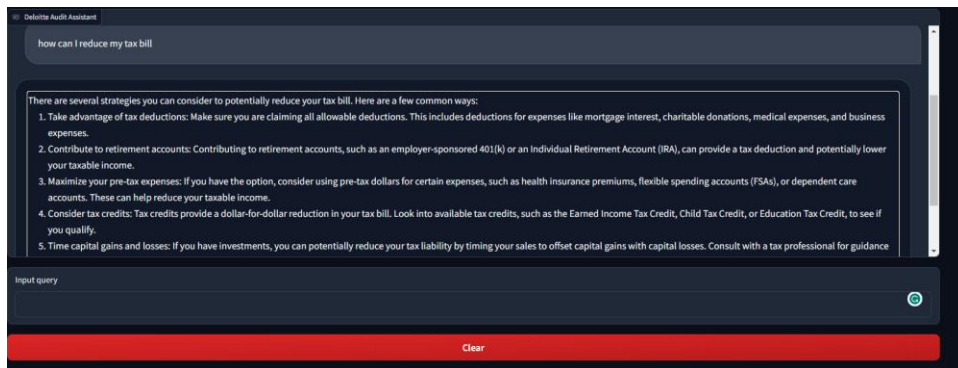

The app is developed with the help of OpenAI API and python and gradio

Illustration:

- 1) The bot specifies it will resolve only tax related queries

- 2) You ask a tax-related query, Deloitte Audit assistant will help you with detailed answer

3) Ask and out of context question, and it will decline the request
